RESEARCH INTERESTS

- Data Center Power Electronics
- Transportation Electrification
- Renewable Energy Integration
- Wide Bandgap Semiconductor Devices

EDUCATION

Seoul National University, Seoul, South Korea Mar. 2023 — Present
M.S. student in Electrical and Computer Engineering Cumulative GPA: 3.98/4.3
Advisor: Shenghui Cui
Thesis: Optimization of Modulation Scheme and Transformer Design of Dual-Active Bridge Converter for Improved Efficiency

École Polytechnique Fédérale de Lausanne (EPFL), Lausanne, Switzerland Feb. 2022 — Jun. 2022
Exchange student in Electrical Engineering

Seoul National University, Seoul, South Korea Mar. 2018 — Feb. 2023
B.S. in Electrical and Computer Engineering (Honors: Summa cum laude) GPA: 3.93/4.3

RESEARCH EXPERIENCES

40 kW Isolated DC-DC Converter Development for Bidirectional EV Fast Charger
Graduate Student Researcher Sep. 2023 — Present
Advisor: Prof. Shenghui Cui Seoul, South Korea

- Designed a high-density SiC-based dual-active bridge converter for a fast DC charger in collaboration with LG Innotek.
- Optimized the physical design of a high-frequency transformer through experimental iteration to enhance efficiency.
- Developed an optimization process to determine the optimal leakage inductance and turns ratio of the transformer.
- Proposed an optimal modulation scheme for the DAB converter, maximizing ZVS capability and minimizing rms current.
- Analyzed the soft-switching characteristics of the DAB converter to reduce switching and conduction losses.

Analysis of Grid-Forming Control for Inverter-Based Resources and Control System Design
Graduate Student Researcher Jan. 2023 — Present
Advisor: Prof. Shenghui Cui Seoul, South Korea

- Developed an experimental setup for hardware-in-the-loop simulation of GFM control, in collaboration with Korea Electric Power Corporation Research Institute.
- Designed a versatile control system based on the TMS320F28379D MCU, incorporating peripherals-ADC, ePWM, etc.
- Investigated FRT strategies and current limitation techniques for GFM control in 3-level voltage source converters.
- Proposed a stable and fast power-voltage control method for IBRs in weak grids using online nonlinear optimization.
- Conducted research on the integration of supercapacitor-based ESSs to provide active inertia power in GFM control.

Development of Core Technology for High-Temperature Superconducting Magnets
Graduate Student Researcher Jan. 2023 — Mar. 2023
Advisors: Prof. Shenghui Cui, Prof. Seungyong Hahn Seoul, South Korea

- Assisted in setting up experiments to investigate superconducting magnet operation under a half-bridge inverter, in collaboration with the SNU Applied Superconductivity Laboratory.

3.2 kW Titanium Plus Power Supply Development for Data Center Power Delivery
Undergraduate Student Researcher Sep. 2022 — Feb. 2023
Advisor: Prof. Shenghui Cui Seoul, South Korea

- Supported the design of a high-efficiency totem-pole bridgeless PFC using SiC and GaN devices for data center power supplies, in collaboration with LG Innotek.
- Conducted research on modulation schemes for totem-pole bridgeless PFC and analyzed efficiency measurement data.

Development of Gate Driver Circuit for 3-Phase 2-Level Voltage Source Converter
Exchange Undergraduate Student Researcher Feb. 2022 — Jun. 2022
Advisor: Prof. Drazen Dujic Lausanne, Switzerland

- Designed and tested a gate driver circuit for voltage sensing and interfacing with a 3-phase 2-level VSC.

HONORS & AWARDS

Ph.D. Study-Abroad Scholarship, Korea Foundation for Advanced Studies (KFAS) Annual research grant supporting Ph.D. studies (up to 5 years) (Selected as one of 4 recipients in Electrical Engineering in 2024)	Fall 2024 — Present
Domestic Graduate Scholarship, SBS Cultural Foundation Full tuition and monthly research grant for promising graduate students (Selected as one of 9 recipients in 2023)	Fall 2023 — Present
SNU Tomorrow's Engineers Membership (STEM) Honor society for engineering students demonstrating excellence in academic achievements	Spring 2021 — Spring 2022
Yangyoung Foundation Scholarship Full tuition support for undergraduate students with outstanding academic performance	Spring 2020 — Fall 2021
Basic Circuit Theory Project Excellence Award 1st place out of 21 teams, <i>Topic: DIY electronic music box</i>	Spring 2019
Academic Excellence Scholarship Full-ride scholarship awarded for academic excellence	Spring 2018
Hanseong Son Jae-han Scholarship Research grant for high school students with exceptional potential in scientific research	2016 — 2017
Korean Physical Society's Physics Camp for High School Girls 2nd place, <i>Topic: Piezoelectric energy harvesting soccer ball</i> Poster presentation at the 2015 KPS Fall Meeting	Summer 2015

SELECTED COURSE PROJECTS

Temperature Estimation of SiC MOSFETs based on Temperature-Sensitive Optical Parameters <i>Course: Power Semiconductor Devices</i> <ul style="list-style-type: none">• Designed a light-receiving circuit considering the luminescence intensity profile of SiC MOSFETs.• Assisted with experimental measurements of luminescence intensity and temperature under different operating currents.	Fall 2022
1 kW BLDC Motor Control for Driving an Electric Scooter <i>Course: Design Project for Electrical Devices and Systems</i> <ul style="list-style-type: none">• Designed a control system using the TMS320F28379D MCU and a 3-phase 2-level voltage source inverter for driving an 1 kW BLDC motor powered by a 48 V battery.	Fall 2021

PRESENTATIONS

Lab Visit Presentation, UC Berkeley

Winter 2024

Berkeley Power Electronics Center, University of California, Berkeley

- Presented research on development of 20 kW SiC-based dual-active bridge converter for EV charger, as a representative of the SNU Power Electronics Center, Seoul National University.

OTHER EXPERIENCES

Teaching Assistant, Seoul National University

- Selected Research Topics in Power Electronics Fall 2024
- Seminar on Electric Energy Conversion and Circuits for M.S. Students Spring 2024
- Design Project for Electrical Devices and Systems: Motor Drive for Electric Scooters Spring 2023, Fall 2023
- Introduction to Circuit Theory and Laboratory Spring 2023

Volunteer Experience, Seoul National University

- **Mentor for STEM Vision Mentoring Program** Summer 2021
— *Guidance and roadmap exploration for high school students*
- **Mentor for AI Tech Play** Spring 2021
— *AI education program for middle school students*
- **Service Award** Summer 2019
— *Recognized for outstanding dedication and contributions to the E&CE student council*
- **Volunteer at Summer Engineering Camp** Summer 2019
— *Engineering workshops for elementary school students*
- **Mentor for Dream Camp** Winter 2018
— *Roadmap exploration mentoring for high school students in underprivileged areas*

LANGUAGES

Korean (Native), **English** (Professional working proficiency, iBT TOEFL Score: 108/120)

ADDITIONAL SKILLS

- **Programming:** C/C++, Python, MATLAB Simulink, L^AT_EX
- **Software:** PLECS, LTspice, Altium, KiCAD, Fusion 360, Code Composer Studio, Typhoon HIL
